Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, embodied in figures 1-8 and encompassing claim(s) 1, drawn to a refrigeration system for a vapor compression refrigeration cycle.

Group II, embodied in figures 9-11 and encompassing claim(s) 2 and 3, drawn to a refrigeration system for a vapor compression refrigeration cycle.

Group III, embodied in figures 12-14 and encompassing claim(s) 4, drawn to a refrigeration system for a vapor compression refrigeration cycle.

2. Group I contains the special technical feature of two distinct compressors, one high-temperature and one-low temperature. Group II has the special technical feature of a single compressor being switched between actuated and suspended states. Group III has the special technical feature of a power supply control means separate from the compressor operation control means.

3. A telephone call was made to D. Richard Anderson, applicant's attorney, on 12/02/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
